

Sling Shot Flyer

STEP 1

Drape the rubber band around the end of popsicle stick to create a loop and secure it in place with tape.

STEP 2

Slot the eraser onto the end of the straw and secure it with masking tape.

STEP 3

Bend the center of the paper clip out so that it is flat. The remaining hooked end should be bent at a 90 degree angle from the straight portion of the paper clip.

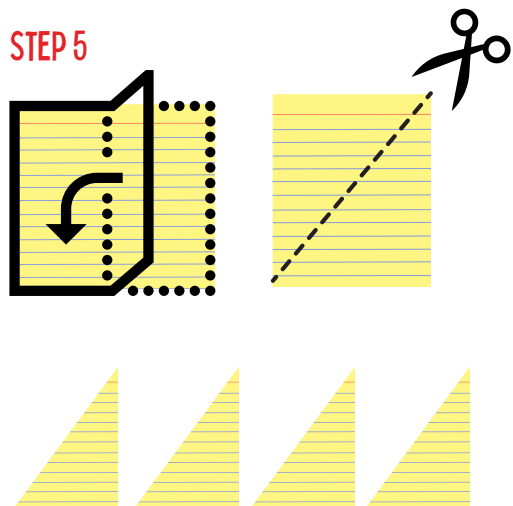

STEP 4

Secure the flat end of the paper clip to the straw using masking tape. Keep the hooked end perpendicular to the straw.

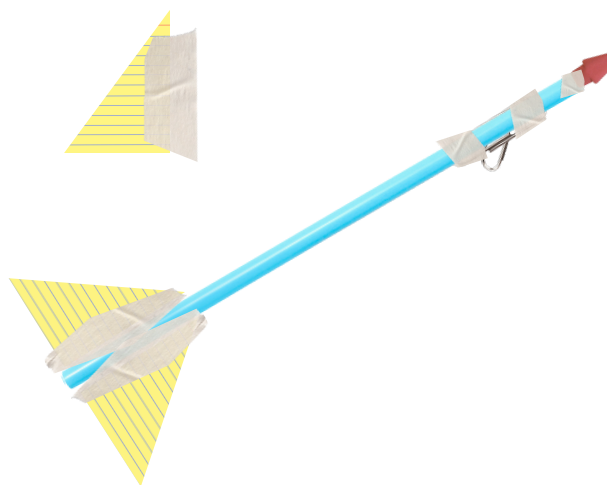

Sling Shot Flyer

STEP 5

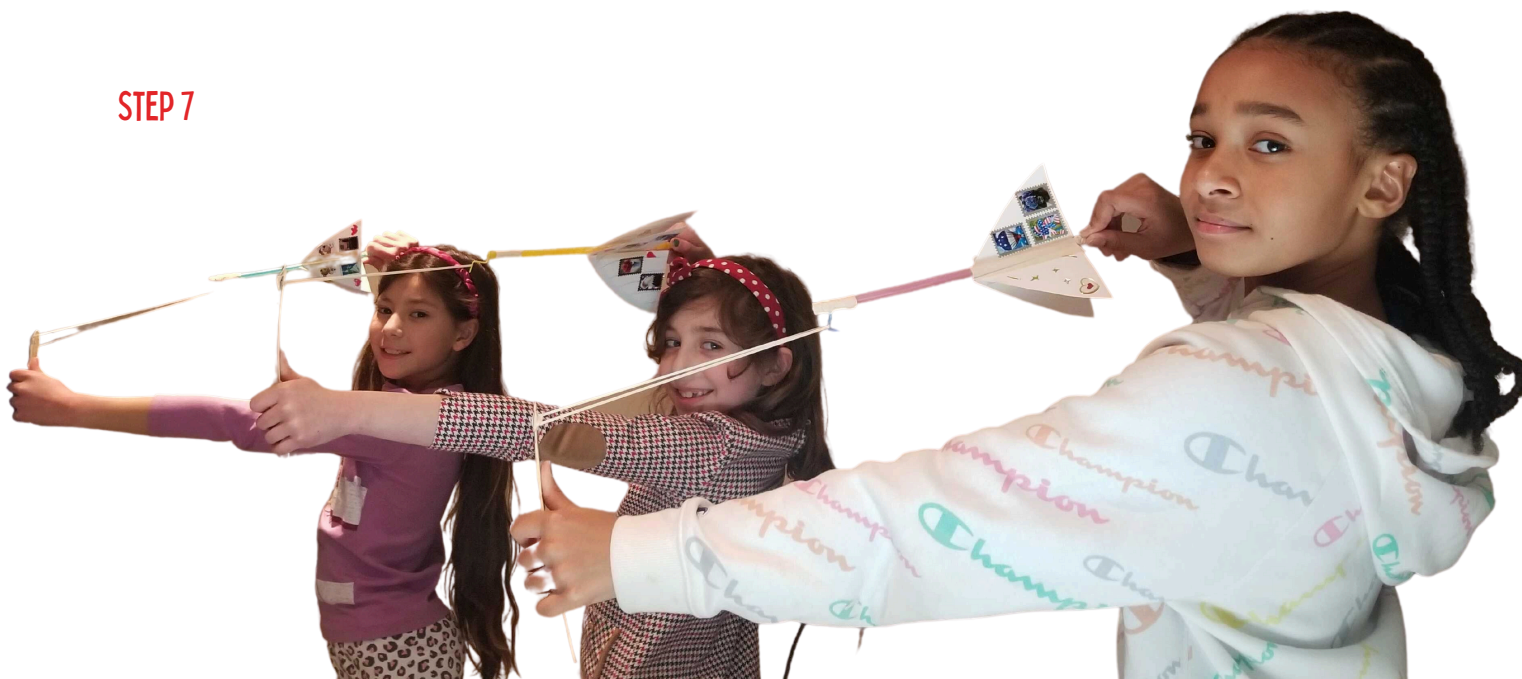

Fold a piece of notecard in half. Cut the corners off at an angle and then in half to create four equally-sized triangles.

STEP 6

Secure each triangle to the base of the straw using masking tape. The base of the straw should now resemble a rocket.

STEP 7

Loop the rubber band on to the hook of the paper clip. Push the popsicle stick away from you and pull the straw towards you. Release the straw and watch your rocket soar!
